**DETAILED ACTION**

***Election/Restrictions***

Applicant's election with traverse of Group II in the reply filed on 7/30/07 is acknowledged. The traversal is on the ground(s) that the invention is unitary. This is not found persuasive because of the reasons set forth in the requirement, the specifics of which have not been addressed.

The requirement is still deemed proper and is therefore made FINAL.

***Drawings***

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because they are informal. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not

Art Unit: 1793

identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 14-26 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,084,148. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to one of ordinary skill in the art at the time the invention was made to use a container, ports, and other apparatus features to perform the claimed method of Patent '148.

#### ***Response to Arguments***

Applicant's arguments filed 11/29/07 have been fully considered but they are not persuasive.

It is argued that '148 differs from the present invention... inlet, gas outlet, etc. This is not persuasive because contrary to Applicant's assertion, many chemical agents are claimed in the '148 patent including oxidizing species, pyrophoric gas, and many specific species thereof (see claims 1-10).

It is argued that Applicant cannot agree. This is not persuasive because apparatus limitations are not given undue patentable weight in method claims.

It is argued that furthermore, there are other affirmative method steps... but not by '148. This is not persuasive because the '148 patent claims introducing and combining first oxidizing and second pyrophoric mixtures to form a third mixture (claim 1) and it would have been obvious to one of ordinary skill the remove the product of a claimed method of reaction upon completion.

#### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action

is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
